

# Save Time, Reduce Data Entry Work

Enable patients to fill out clinical forms on most devices with Instant Medical History (IMH)

When patients have to fill out paper forms before an appointment, it can set the tone for a less than satisfactory experience. The time involved in entering handwritten information can also be burdensome to an already overextended staff. Plus, patients have become familiar with digital forms.

## Optimize your clinical intake process

With Instant Medical History (IMH) Base or IMH Custom, patients can fill out clinical forms online from anywhere on most devices. The patient information automatically populates in the EHR/PM system and is ready for providers to review within the patient's chart. IMH is an optional purchase with NextGen® Patient Experience Platform.

For your staff and providers, this means a significant reduction in data entry work. Patient encounters become more productive. IMH supports your practice's efforts to increase patient portal use and improve patient outcomes—all beneficial in boosting patient and provider satisfaction.

## Features

### IMH Base

- **Multiple delivery methods**—send forms via the patient portal, NextGen® EDI appointment reminders, most outside appointment reminder platforms, or as part of a virtual visit intake
- **More than 75 forms**—use forms for historical information, review of systems, screening tools, chronic disease questionnaires, and more
- **Specific forms for specialties**—include family medicine/CHC, ophthalmology, orthopedics, OBGYN, and behavioral health
- **Spanish translations**—use more than 50 forms
- **Discrete data flow**—securely transfer completed clinical data to the patient's chart in the EHR
- **Document summary**—provide a PDF document summary of a patient's answers and attach it to an encounter in their chart

### IMH Custom

- **Custom forms**—customize existing forms or make changes to back-end tables or templates associated with forms—also create non-English versions of custom forms
- **Additional languages**—provide other language versions of standard forms—such as Arabic, Portuguese, Swedish, and Haitian-Creole (Alternative languages are available for a fee)
- **Discrete data flow**—securely transfer completed clinical data to the patient's chart in the EHR with the option to be reviewed and approved
- **Workflow notifications**—send status updates to the appointments table and workflow tasks
